

PRONATIV®

Protein Water

with Pronativ® - Native Whey Protein

Sports nutrition is aimed at a wide consumer target from performance athletes, to lifestyle consumers who does sport occasionally.

Many consumers have become aware that protein is a nutrient that supports good health. One thing remains constant over time: the attraction of consumers for protein products.

In the recent years, a wide range of protein products have been developed in this market for healthy hydration products. Fortified water is a healthy hydration beverage that is growing in popularity. It meets the demands of the modern consumers by providing low calories, great taste, lack of preservatives, and no artificial flavors or sugar. Besides, the easy-to-drink format meets the need for practicality.

A protein water to stimulate muscle recovery

This clear water-based drink provides a high nutritional value and a high protein solution in an easy-to-consume 473 ml bottle. It is made with a high quality protein directly extracted from milk at a low temperature: native whey protein. This excellent source of protein will help to build and repair body tissues, to build antibodies and to build strong muscles.

Adding expertise, delivering quality
